Date: २०७१-४-१५

**Subject: Thank you for documentary show**

Dear Bev,

We would like to thank you and congratulate you for your huge effort against violence against women. Your wall of hope campaign will always encourage us to raise our voice against such issues.

The documentary '*from fear to freedom*' hasn't mentioned anything new that we don't know. It has just put forward the things that we have ignored, known yet overlooked. We do need to be reminded and constantly poked with such information because what we had felt while watching the documentary needs to be permanently engraved in our heart and mind, so that we have enough courage to take the first step to make a difference that is needed to bring a change. It was a very good way to aware us, everyone, about the actual situation. This video has indeed touched our heart, made our mind stronger.

We may, still, not have enough courage to speak against that male in the public vehicle but instead of keeping my eyes down and acting as if we may not have heard anything, now, we can indeed give him a look of utter disdain. We hope that the straightforward and modest girl will someday find this same strength as well.

Thanking you

Student Society
